SUMMARY

Promising entry-level Full-Stack Developer with great drive and an analytical mind. Strong collaborative skills and avaricious learning habits allow for clean, clear and efficient code production. Keen to tackle bigger challenges and continually develop skills alongside industry professionals. Looking for various web developer roles but able to learn other skillsets quickly.

TECHNICAL SKILLS

Languages: Javascript/ES6, HTML5, CSS3, MySQL, Python (beginner).
Technologies: Node.js, Express.js, jQuery, Git, Bootstrap, Firebase, Google Maps API, React (beginner).
Next Skills: MongoDB, Java, Python (intermediate).
Top Soft Skills: Effective communicator, researcher and problem solver, adaptable, affable/positive team influence.

EDUCATION

Full-Stack Programming Boot Camp   *Nov 2018 - Present*
University of Kansas (Lawrence/Overland Park, KS)
An intensive 24-week boot camp dedicated to designing and building web applications. Studying a wide range of languages and abilities (see technical skills section).
- Awarded 'Most Useful Project' for *Scout* (ride-share comparison app).
- 4.0 GPA

Bachelor of Music (with Honours)   *Sep 2013 - Jun 2015*
Birmingham City University (Birmingham, England)

FEATURED PROJECT - *SCOUT*

- **Description:** *Ride-share comparison application with an emphasis on functionality and simplicity.*
- **My role:** I worked implementing the Google Maps API into the project (user location, highlight route), as well as UI/ UX and logo design. I was also assigned to float/assist others as I work relatively quickly, have a good knowledge of JavaScript/APIs, and am quick to identify errors. I converted the app to run with backend after our node.js lessons.
- **Languages/Tech used:** HTML / CSS / Bootstrap / JavaScript / jQuery / API (Google Maps, Uber, Lyft) / Express.js
- **View here:** *github.com/djwasing/Scout-Project-App*

EXPERIENCE

Music Composer / Freelance - Guildford, England   *Sep 2015 - Oct 2018*
- Composed music on a Digital Audio Workstation (Logic Pro X) using both live and digital sounds to effectively collaborate and produce tailored scores for clients.
- Developed creative problem solving skills when using software to manipulate audio in sound design sessions.

Staff Content Writer / Moviepilot - Berlin, Germany   *Oct 2016 - Mar 2017*
- Wrote pop-culture video game articles in a startup to a large audience, achieving 800,000+ views across 84 articles.
- Used data analysis (parse.ly & google analytics) in studying viewer habits and SEO trends to improve content and reach.
